Invitation

Dear Colleagues,

Welcome to the 2024 Annual Congress of the Swiss Society of Senology, which - following a good tradition - will seamlessly merge with the MIBB Practical Course and the MIBB Symposium as a joint event.

When assembling the scientific program, the focus was on imparting knowledge and promoting interdisciplinary dialogue. We are proud that we have been able to attract internationally recognized speakers alongside esteemed experts from Switzerland, ensuring a rich and varied exchange of ideas.

The MIBB practical course at the Inselspital in Bern will kick off the event on 11 September. This will be followed on the morning of 12 September by the MIBB Symposium, which will deal with various facets of radiological and minimally invasive diagnostics of breast diseases. The subsequent annual congress promises exciting discussions on neoadjuvant treatment paradigms, interesting findings from breast pathology and differentiated surgical considerations, including the skillful handling of complications. In addition, this year's program offers special sessions on innovative advances in senology and integrative oncology for breast cancer patients.

We invite you to immerse yourself in stimulating discourse and make valuable contacts with other professionals during these two insightful days in Bern.
